Cybersecurity IoT Enthusiast | B.Tech Computer Science Student

EDUCATION

Bangalore Institute of Technology (BIT)
B.Tech in CSE (IoT, Cybersecurity, Blockchain)

Bengaluru, Karnataka
Expected 2028

- **Academic Standing:** Current CGPA **9.52 / 10.0** (4th Semester)
- **Core Coursework:** Data Structures, Operating Systems, DBMS (SQL), Computer Networks.

TECHNICAL SKILLS

- **Languages:** C, Java, Python, JavaScript (ES6+), SQL (MySQL)
- **Web Development:** HTML5, CSS3, Frontend Development Fundamentals
- **Cybersecurity:** Threat Scanning, Integrity Verification, Real-time Identification

ACADEMIC PROJECTS

Scan Safe — Cybersecurity Threat Detection

Python

- Engineered a security application to scan data for potential threats and ensure file integrity.
- Developed real-time threat identification logic and an automated user notification system.

Blind Assist — Accessibility Engineering

Python, UI/UX

- Created a navigation tool for visually impaired users utilizing object recognition.
- Designed an intuitive feedback mechanism to improve user interaction with their surroundings.

Library Management System

Java, SQL

- Built a full-cycle inventory tracking system for book records and student transactions.
- Leveraged SQL for backend data management to ensure low-latency search and retrieval.

Parking Management System

Java

- Implemented a logic-based parking system for automated slot tracking and vehicle management.

CERTIFICATIONS

- **Python Programming** – Nxtwave
- **MySQL Database Management** – Nxtwave
- **HTML / CSS Web Development** – Nxtwave
